## REASONS FOR ALLOWANCE

### *Oath/Declaration*

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

The inventor Derek M. Stein has improperly dated the oath. Thus failing to properly execute the oath.

The following is an examiner's statement of reasons for allowance:

Claims 1, 5-9 are allowable over the prior art of record because the prior art of record does not teach the claimed subject matter including utilizing a periodic flux of ions having a duty cycle at first and second exposure temperatures as claimed for changing at least one physical dimension by adding material to the structure of the feature.

Claims 2-12 are allowable over the prior art of record because the prior art of record does not teach the claimed subject matter including controlling the ion flux duty cycle as claimed for changing at least one physical dimension of the feature by adding material to the structure of the feature.

The closest prior art of record to U.S. Pat. No. 6,106,677 to Sandhu discloses depositing a layer and then resputtering the layer so that some of the material of the layer is sputtered from the layer and into the aperture (see Figures 2 & 3). There is no

disclosure of utilizing an ion duty cycle to add material to a feature or utilizing first and second temperature with the duty cycle to add material to a feature.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
